DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claim 14, drawn to a semiconductor device, classified in class 257, subclass 382.
- II. Claims 1-13, drawn to method of manufacturing a semiconductor device, classified in class 438, subclass 15+.

Inventions I and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the contact hole in the insulating layer is formed by an etching process and alternatively the contact hole could be formed by selective deposition.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
